

Sanilögy

India Upgraded Every Experience. **Except Public Toilets**

Experience Economy Is Repricing Urban Hygiene

Urban Consumer Shift

- 50%+ of India's population is under 30 → experience-first generation
- Urban consumers increasingly spend on comfort & convenience
- Hygiene awareness structurally increased post-COVID

Payment Behavior Has Changed

- UPI processes 10+ billion transactions monthly
- Micro-payments of ₹20–₹30 are frictionless
- Consumers already pay premium for parking, coffee, delivery convenience

**The consumer
is ready to pay**

**But Service not
available**

Our Solution: **AI & IoT Powered AutoClean Premium Pod**

A deep-tech, compact sanitation unit designed for the experience economy.

What Makes It Different

AI + IoT Layer

- Usage-based automated cleaning
- Smart hygiene monitoring
- Real-time performance tracking
- Predictive maintenance alerts

Automation Layer

- Auto seat & bowl cleaning
- UV sanitization
- Touchless access & payment

Urban Design Layer

- 24–30 sq ft footprint
- Anti-vandal engineering
- Modular plug-and-play deployment

Why It Works Built for Dense India. Assured by Technology.

25–30 Sq Ft

25–30 Sq Ft Footprint
Fits dense urban pockets.

AI-Monitored Quality Layer
Usage-triggered automation

City-Cluster Scalable
Replicable urban deployment

SAE
1122 today
Auto-clean triggered

Product **Advantage**

1.Automation-First Architecture

- Usage-triggered auto-clean
- UV sanitization
- Touchless operation

1. Anti-Vandal Engineering

- Reinforced materials
- Concealed systems
- Public-use durability design

1. Smart Monitoring Layer

- Real-time usage tracking
- Remote performance alerts
- Predictive maintenance

1. Low O&M Dependency

- Reduced manual intervention
- Standardized cleaning cycles
- Controlled consumable usage

1. Scalable Modular Design

- Plug-and-play deployment
- Replicable unit architecture
- Network-ready hardware

6. Design For

- Indian Use Behaviour
- Indian User
- Indian System

Market Size & Penetration Potential

₹1,200 Cr

Annual Urban Transaction Potential

₹1,200 Cr Annual Urban Transaction Potential

Go To Market

1. Private Entrepreneur Model

- ✓ Local operator purchases pod
- ✓ AI + IoT tech layer provided
- ✓ Annual AMC + tech subscription
- ✓ Asset-light expansion

2. Urban Asset Model (JCDecaux-Style)

- ✓ Strategic urban location rights
- ✓ Smart street furniture deployment
- ✓ Sanitation + DOOH revenue
- ✓ High-margin cluster deployment

Non-Govt Scalable Rollout

Revenue Model

1. Core Revenue

Premium Toilet

₹20–30 Per Use

High-frequency daily category

2. Experience Add-On

Shower

Higher ticket size

Transit & traveler focused

3. Urban Media Layer

DOOH Advertising

High-footfall visibility

Recurring brand partnerships

4. Recurring Platform Income

AMC + Tech Subscription

AI + IoT monitoring

Predictive maintenance

Network control layer

Multi-layer revenue. One standardized asset.

Unit Economics

1. CAPEX

₹5–7 Lac

2. Monthly Revenue

- Premium Toilet → ₹60,000
- DOOH → ₹25,000–₹30,000

Total → ₹85,000–₹90,000

Total → ₹85,000–₹90,000

3. Monthly OPEX

Monthly OPEX
₹15,000–₹20,000

4. Monthly EBITDA

Monthly EBITDA
₹65,000–₹70,000

Conservative Case: At 50 users/day → Payback ~15 months

< 12 MONTH PAYBACK

Competitive Positioning

✗ Not an NGO Model

- ~~Not subsidy dependent~~
- ~~Not donation driven~~

✗ Not an Aggregator

- ~~Not listing third-party toilets~~
- ~~We own the product architecture~~

✗ Not Basic “Pay & Use”

- ~~Not manual~~
- ~~Not inconsistent~~
- ~~Not commodity sanitation~~

Deep-Tech Urban Micro-Infrastructure

- ✓ / AI-powered
- ✓ / IoT-monitored
- ✓ / Productized
- ✓ / Revenue-generating
- ✓ / Scalable

We are building a new category:
**Premium Sanitation
Infrastructure.**

Conservative Case: At 50 users/day → Payback ~15 months

Scale Blueprint

Density-Driven Rollout

Shared AMC Hub in Each City Cluster → Lower OPEX → Faster, Predictable Expansion

Why **US** – 10+ yrs Exp. Public Toilet Design and O&M

Yashwant Suthar,
CTO - Founder
Master Of Design (IIT Delhi)

Strategy , Planning & New
Product Development

Total 16yrs experience.
Startuppreunner from 2014 and
9 Yrs Public Toilet Design,
Operation And Management
Experience

Neelam Singh,
CEO, Co-Founder,
Operation, and Finance

07 years' experience in Audit
& Quality Control. 08 Year
Experience in public toilet
operation and management

Educational Qualification

- O B.Ed
- O B. A.

Professional Experience

- Assitant Manger in
Circulation at Danik Bhaskar
2013 – 2016
- Back-office manager 4yrs
experience in various private
organization.

Ayush Sharma
(Outsourced Team)
Embedded Developer

08 Yrs Experience in
Embedded design and
development .
BE in Electronics and
Communication

Krutika Pache
Operation and admin
Manager

11Yrs Exp. In Operation
and 03 Year
Experience in public
toilet operation and
management
